					<input type="checkbox"/>

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:** Sampled unnamed tributary to the Matanuska River that runs along the east side of a large dike. Sampled with minnow traps baited with salmon eggs and Smith-Root model 12 Electrofisher. Caught 20 juvenile coho in the traps and 16 juveniles with the electrofisher.

Name of Observer (please print): CEVIN GILLELAND, DAVID RYLAND  
Signature: [Signature]  
Address: 333 RASPBERRY ROAD  
ANCHORAGE, AK 99518

Date: 10/25/01

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.

Signature of Area Biologist: \_\_\_\_\_
